Foundations 2 week 1 assessment

Finding patterns questions/

data analysis

Women : 4

2-3 times per month: 2

Every day: 1

Once a month: 1

Note: The women seem to order less? But that only seems due to a low majority of them.

Quality is a major factor

Women not very picky with lunch food

Men: 7

Purchase compared to making lunch

2-3 times per week: 2

Weekly: 2

Once a month: 2

2-3 times per month: 1

Yes 4

Maybe 3

Note: it seems that men seem to order lunch more on a weekly basis, with salad/health places and pizza places being the popular vote amongst them.

Most would like to know where to get food from a new place while the others say maybe

With food quality and location speed being the major vote for factors on deciding.

The men are not picky with lunch food

Non-binary: 2

Weekly: 1

Everyday: 1

Seem to order less but there is a small denominator.

Is not picky with food, pizza is popular

Analysis overall

It seems that a lot of people would enjoy having an application that can show you new restaurants in the area, being a majority of the voters order out a lot and are not picky eaters.

Many of them do not seem to be too worried about spending costs but a lot of them do care about quality and speed.

Application Name:

GOGOFOOD

Description: An application designed to cater to your food preferences as well as getting it to you as fast as possible.

What makes us stand out from the rest of the other food delivery applications is that we are designed to find and locate new or already existing restaurants for you, as well as cater to your preferences, Not only does the application learn about you as you choose a restaurant and eat your food order, it finds great rated places and gets the delivery to you as fast as possible.

This application also works with restaurants Rated the highest in the area, giving employment to those in the area looking to make some pocket cash but are also efficient and fast at what they do. The whole idea is to be quick!

Features/Functionality

Feature:

- This app features pinpointing gps location, it finds high rated establishments and locates a driver who is located nearby so you can beat those pesky waiting times.
- Has the ability to analyze where you're ordering from, how far you're ordering from and what you're ordering, so that it can use the information

to find other establishments in the area and what foods you might like to try from them.

- The app also features an efficient working interface for the merchant and delivery driver, keeping them up to date with the customer, as well as each other.
- Has a premium subscription for those who would enjoy Drone delivery. (in testing)
